Key Tronic Responds

Key Tronic Corporation is the world's leading manufacturer of electronic keyboards. Over 3,000 different versions are sold worldwide, supplying 65% of today's new keyboard applications. Since 1969, Key Tronic has placed over 2 million keyboards in the field. This success is largely attributed to the in-house design, tooling, and manufacturing facilities. Production of all plastic parts, printed circuit boards, and frames allows complete control over price, quality, and delivery. These controls extend back to the initial design of parts through assembly and testing.

To keep pace with the growing demand for keyboards in the industry, several supplemental manufacturing facilities have been established:

- Corporate Headquarters is located in the Spokane Industrial Park. In addition to marketing, sales, and administration, this facility houses complete manufacturing capabilities from design through production.

*CORPORATE HEADQUARTERS
SPOKANE INDUSTRIAL PARK*

- The Newport Plant, specializing in high-volume standard profile keyboard production, is fifty miles north of Corporate Headquarters.

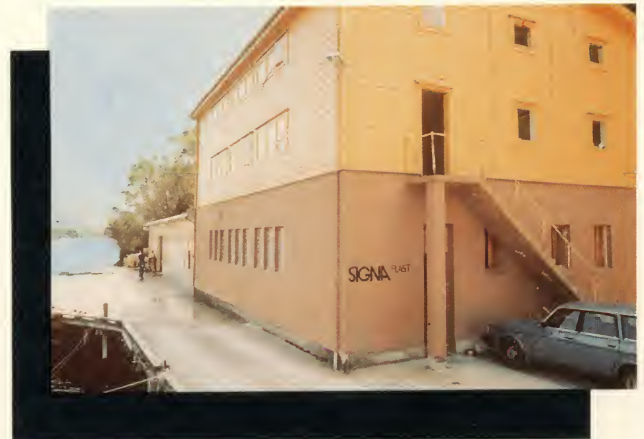

- Cheney, just west of Spokane, is the manufacturing site of the new generation of "low profile" 30mm keyboards.

CHENEY, WASHINGTON

- Key Tronic's European keytop molding facility, Signa Plast, in Litlebergen, Norway, supplies both domestic and international keytop requirements.

NORWAY

- Facilities in Korea and Taiwan supply keyboards to overseas terminals and computer manufacturers.

Key Tronic will respond to your individual needs with the capabilities, products, and people that have made us the world's leading keyboard manufacturer. Contact your Key Tronic representative today!

Key Tronic
Has Set The Standard
For PCjr*Keyboards.

If you're serious about the PCjr,*

Ask for the Key Tronic Keyboard.

When you buy your IBM PCjr,* be sure to ask for Key Tronic's new plug-compatible keyboard to complete your system.

Engineered in the Key Tronic tradition for reliability and operator comfort, this low-profile keyboard adds a dimension of professional performance to your system.

- Familiar typewriter key layout
- Separate numeric, cursor, and function keys
- LED indicators on lock keys
- Solid-State capacitive switches

Ask your computer dealer for a demonstration. You'll see why Key Tronic has set the standard for PCjr* keyboards.

Suggested Retail Price: \$255.00.

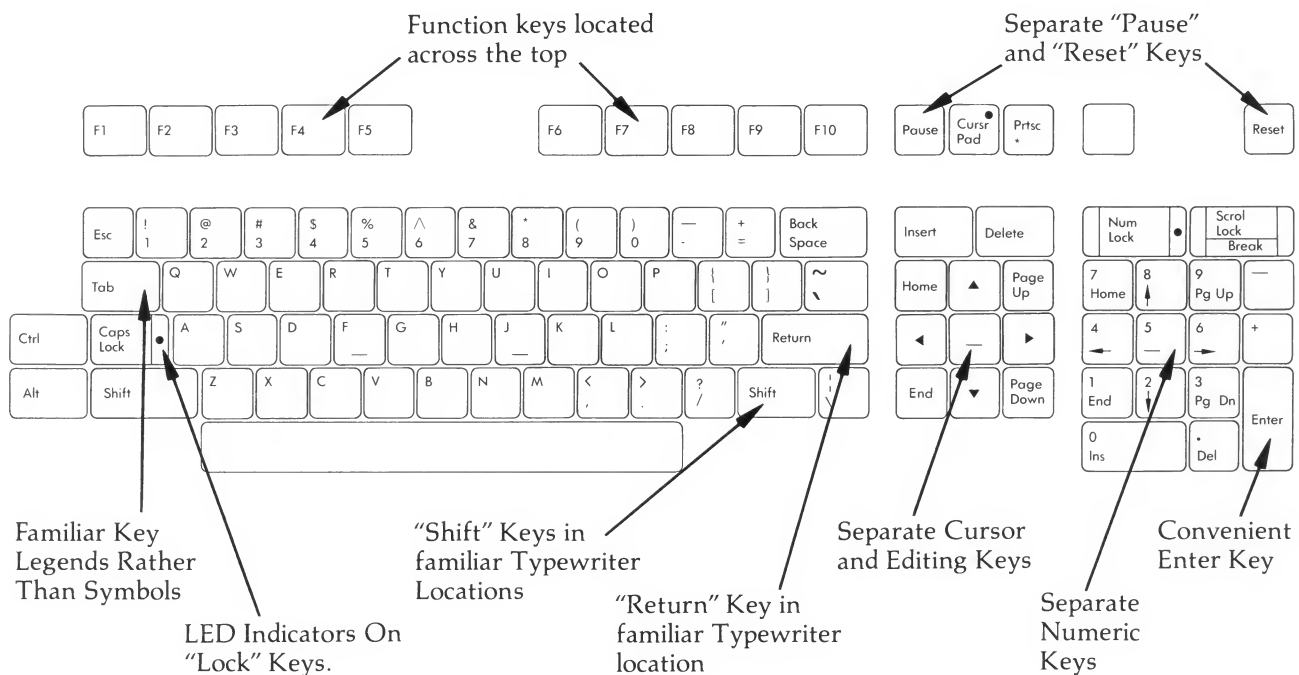

For information on Model KB-5151jr, call Key Tronic Toll Free 1-800-262-6006. (7 a.m. - 3 p.m. Pacific Time). Warranty information may be obtained by writing to the address below.

The KB5151jr Keyboard.

Plug-Compatible With IBM PCjr*

Complete your IBM PCjr* with a Key Tronic Keyboard.

Key Tronic has incorporated many features into its KB 5151jr that enhance your PCjr*'s performance, without affecting the computer's intended functions in any way.

Familiar typewriter key locations and legends.

With Key Tronic's KB 5151jr, there's no need to learn a new keyboard layout. Along with easily-read legends, special homing keys are used for the F and J index finger locations, and for the 5 in the numeric pad.

LED status indicators.

A frequent cause of operating errors is the mistaken setting of "lock" keys. Key Tronic has added LED indicators to those keys so you can tell at a glance which mode they are in.

Separate numeric, cursor and function keys.

For greater convenience, and to help prevent entry errors, Key Tronic has set aside separate areas for numeric, cursor and function keys.

Key Tronic's design and engineering excellence.

Best of all, KB 5151jr is made by Key Tronic, the world's largest independent manufacturer of computer keyboards. As with other Key Tronic full-travel plug-compatible keyboards, the new PCjr* keyboard includes microprocessor electronics, solid-state capacitive switches and a well-earned reputation for reliability and durability.

TECHNICAL SPECIFICATIONS

Electrical Data

Input Power: +5V DC @ 100 ma. typ.

Serial Data Output: 1 start bit, 8 data bits, 1 parity bit (odd), BI-PHASE.

Connector Detail:

Cable Pin	Keyboard Header Pin	Function
3	2	Data
4,6	5	+5V
5	6	Ground

Connector shell is chassis ground. Coiled, shielded cable supplied is 6 foot, 26 gauge which mates with DIN connector AMP 3-520141-4 or equivalent.

Keyboard Dimensions

LENGTH 20.19 in.
 DEPTH 8.58 in.
 HEIGHT 1.55 in.
 WEIGHT 5.9 lbs.

NEWS RELEASE

FOR IMMEDIATE RELEASE

(Spokane, Washington) Key Tronic Corporation has introduced a professional-grade, plug-compatible keyboard for IBM's new PCjr, it was announced by Mark Tiddens, Key Tronic Marketing Manager.

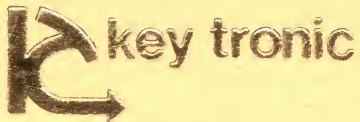

Engineered similarly to popular Key Tronic keyboards for the IBM PC, this new full-travel PCjr keyboard features a low-profile design, familiar typewriter key location, LED indicators on lock keys, solid-state capacitive switches, connector cable, and separate numeric, cursor and function key areas.

"Our new PCjr keyboard was designed for the benefit of those who want professional performance from their PCjr systems," Tiddens explained. "We've learned from experience that operator-comfort features and keyboard durability are very important in most applications."

Tiddens went on to say that persons interested in the new PCjr keyboard may ask their respective computer dealers for a hands-on demonstration, or they can call Key Tronic, toll-free, for more information: 1-800-262-6006.

Color photographs of Key Tronic's PCjr keyboard are available by calling the above toll-free number or by writing to:
